

6- The right aim

- 1- In groups of 3, 4 or 5 students.
- 2- Each student throws 3 balls, one after the other, from a specific location.
- 3- Before he strikes, he says what his target will be. If he succeeds in getting his aim right, he scores a point. During this time, the other students are the judges.
- 4- You can separate the service area into 4 zones to determine the score.
